

INTRODUCING

*CirQ-Life* **PLUS** ADDRESSES CHRONIC INFLAMMATION,  
WHICH IS THE ROOT CAUSE OF ALL CHRONIC DISEASES.

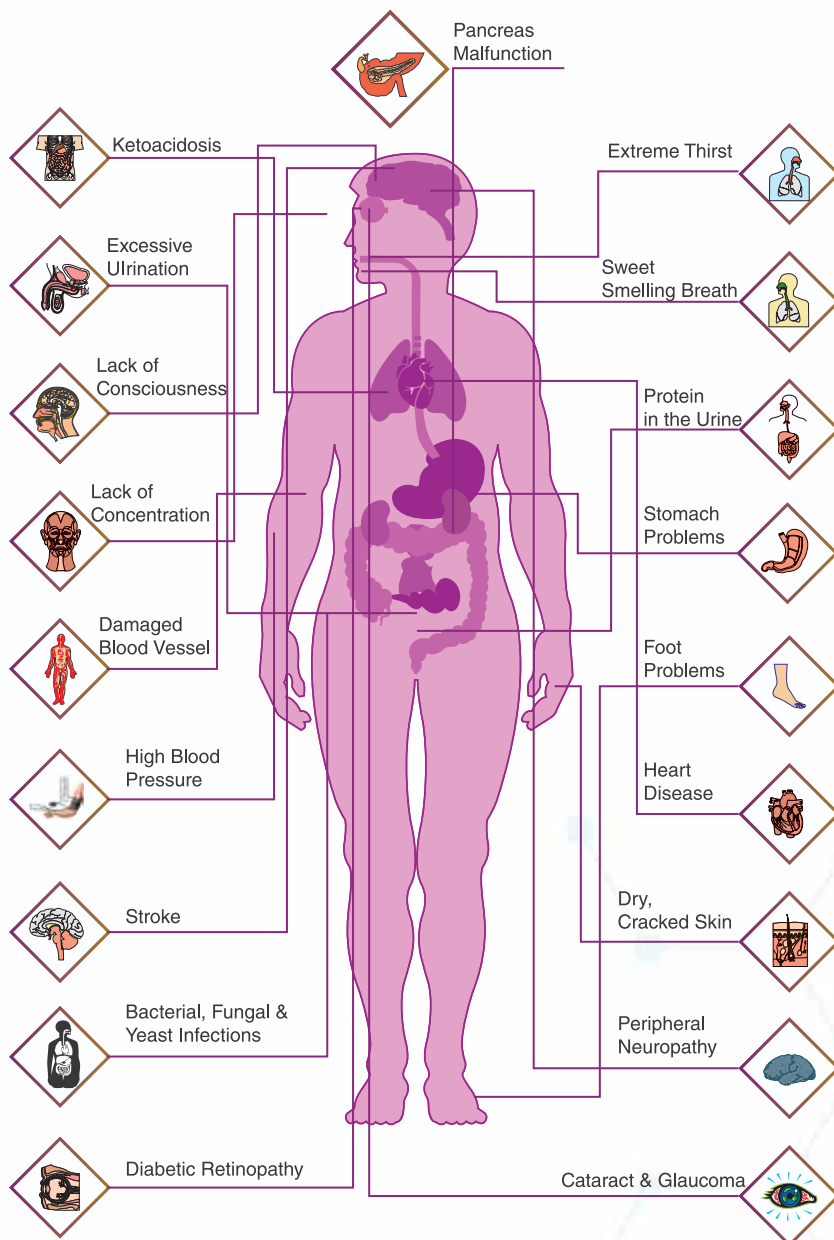

## What is Microcirculation?

Microcirculation consists of the numerous small, tiny and almost invisible blood vessels that carry blood, oxygen and nutrients from the regular small arterial blood vessels to each individual cell within all the organs in the body. These invisible blood vessels also collect the waste products and other metabolites that are secreted by each individual cell and return these end products via the venous blood vessels to the liver and kidney for waste disposal. The health of these micro-vessels determines the health of the individual cell and, in turn, the health of the organs and is then mirrored in the health of that person.

The first sign of aging in any individual occurs in the gradual deterioration of the microcirculation. The smooth muscle within these invisible blood vessels begins to lose its elasticity and gradually hardens. The lumen narrows thus causing the blood flow to slow and stagnate. This is followed by blockages, leaks and breakdown. The function of the cells and organs begin to decrease and become unable to repair itself from any significant damages. One's health begins to deteriorate and many chronic diseases will begin to manifest in these individuals, i.e. hypertension, stroke, diabetes, Alzheimer's and many others.

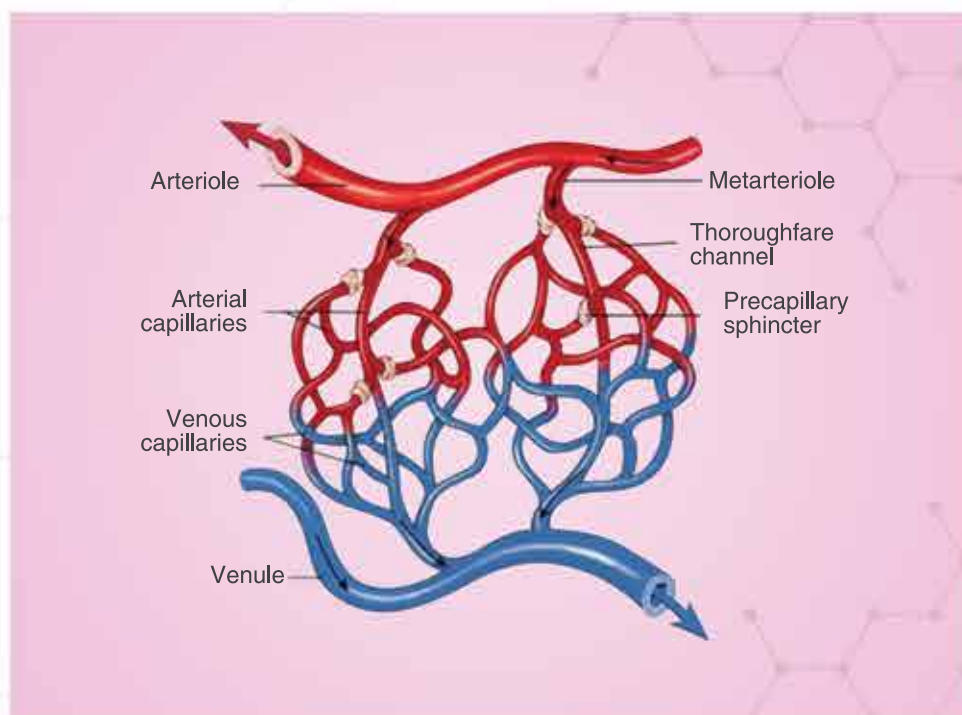

# How Poor Microcirculation Affects the Entire Body?

## How Does Good Microcirculation Benefit Your Health?

Good microcirculation strengthens the delivery of oxygenated blood and nutrients to the individual cells and the major organs. It improves the stagnated blood flow (increases arterial, venous and lymphatic flow), invigorates cell activities, enhances normal organ functions, retards the aging process and restores the body's overall health.

When the microcirculation of an area begins to fail, the organ or tissue being supplied also begins to fail. Hence good microcirculation is very important for the health of all organs and tissues.

# What is CirQ-Life Plus and What Does CirQ-Life Plus Do?

CirQ-Life Plus is a natural health supplement for maintaining healthy micro-circulation. Good micro-circulation strengthens the delivery of oxygenated blood and nutrients to the individual cells and the major organs. It improves the stagnated blood flow (increases arterial, venous and lymphatic flow), invigorates cell activities, enhances normal organ functions, retard the aging process and restores the body's overall health. In the long run, CirQ-Life Plus has the ability to improve the elasticity of the smooth muscles within the small blood vessels which then enables the micro-vessels to behave in a more youthful state. CirQ-Life Plus also decreases Chronic Inflammation, which is the root cause of most chronic diseases.

## **Benefits of CirQ-Life Plus / What does CirQ-Life Plus do?**

- ✿ Decreases Chronic Inflammation
- ✿ Restore endothelium dysfunction
- ✿ Causes vasodilation via the NO (nitric oxide) pathway
- ✿ Relax smooth muscles surrounding the blood vessels
- ✿ Increase the microcirculation to the cells, tissues or organs
- ✿ Modulates the elasticity of the blood vessel
- ✿ Decreases blood adhesiveness & allows the blood to easily pass through the micro-vessels
- ✿ Increases energy level
- ✿ Restore internal organ's function
- ✿ Better sleep & better hormone secretion

## What are the ingredients Of CirQ-Life Plus?

**CORDYCEPS** : Cordyceps have long been used as an anti-aging herb in ancient Chinese Pharmacopeia. Cordyceps is a natural anti-oxidant that will help increase vitality and activity tolerance. It is the most sought after natural rejuvenation herb for the last 10 years.

**COLOSTRUM EXTRACT** : In addition to help strengthen one's immunity, colostrum also promotes the growth of bone, cartilage and muscles. It has the important function of relaxing the muscles and balancing the cellular functions through increased energy production of the individual cells.

**METHOCEL** : Methocel is a soluble fiber commonly found in fruits, vegetables, roots and grains. As one of the 7 essential nutrients that sustain human life, it has the ability to help promote the growth of beneficial bacteria and motility of the bowels. It helps detoxification & maintenance of the health of bowel.

**FORSKOHLII ROOT EXTRACT** : A traditional Ayurvedic medicinal plant used to alleviate insomnia & keep blood vessels unblocked; maintaining the health of the heart & circulation.

**RESVERATROL** : Research by Japanese scientists has shown that resveratrol extracted from grapes have potent anti-oxidative effects. Besides, it helps regulate the metabolism of bad lipids, thereby reducing the waste & toxins in the blood of the circulation. University of Illinois also discovered thrombus could induce heart attack & stroke. It is a well accepted anti-aging food supplement.

---

## How to take CirQ-Life Plus?

- ✿ For Adult use Only
- ✿ Take one to two gelcapsules in the morning and one to two at night.
- ✿ Best taken on an empty stomach first thing in the morning and last thing before bed or as directed by your healthcare professional
- ✿ Not to be consumed by pregnant woman or children under 18 unless the supervision of a physician.
